

# Wanted!!!

Chelsea -

I have the students cube this project. They should use a tissue box. On the sides of the tissue box, students will answer the 8 bullet points and tape or glue to the tissue box. Since there are only 6 sides, combine some answers. If my students bring me a FULL tissue box, they earn 5 bonus points for the project. Total pts = 40

p. 15  
in textbook  
has a great  
list!

potential score 45/40

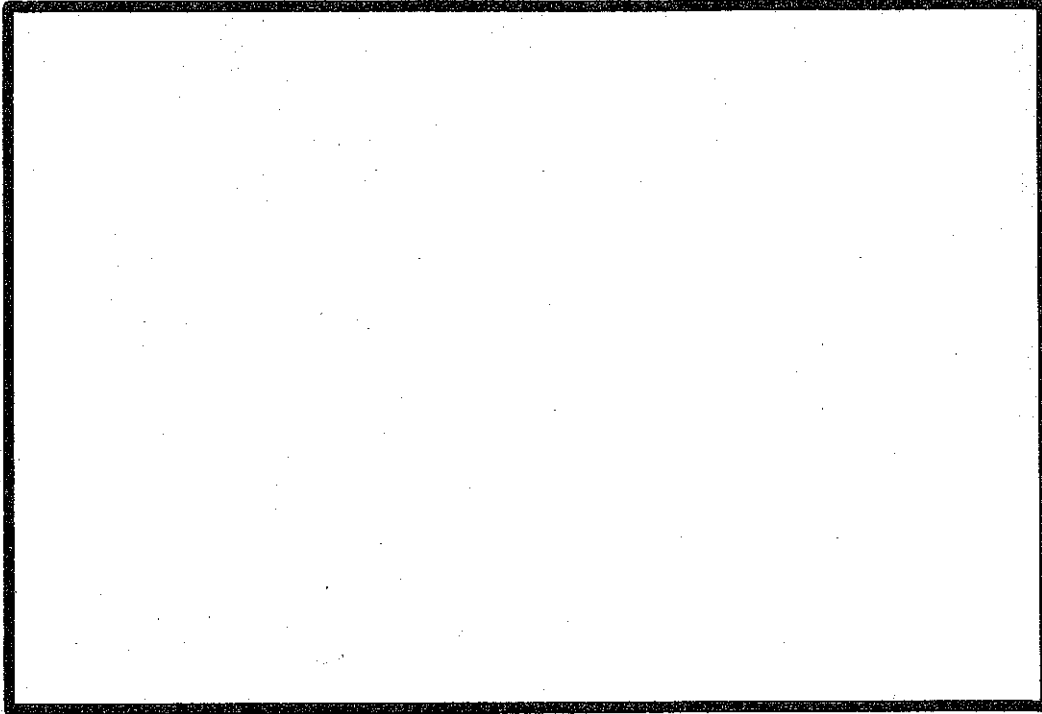

Create a "Wanted" poster for a biological hazard.

Using your textbook, locate the following information to include on your final product:

- 1 • Name of Hazard
- 2 • Name of Associated Illness
- 3 • List of Foods commonly linked to hazard
- 4 • List of common symptoms
- 5 • Prevention measures
- 6 • Requirements for growth
- 7 • Any additional information from text
- 8 • Picture relating to your hazard

Make sure your poster is organized and colorful!!!
